NOTICE OF ALLOWANCE

This is a Notice of Allowance in response to the AMENDMENT filed 8/22/2008. The present US Application 10/584705, filed 06/23/2006, is a national stage entry of PCT/IB04/52847, international Filing Date: 12/17/2004.

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d) for UK Application No. 0330076.1, filed 12/27/2003, which papers have been placed of record in the file.

Claims 1-15 were previously rejected. Claim 16 is newly added.

Claims 1-16 remain in the Application.

The "Replacement Sheet" drawings for Fig. 3 received on 8/22/2008 are acceptable.

Rejection of the Claims under 35 U.S.C. 112, second paragraph, has been withdrawn in view of the amendment to the claims.

Rejection of the claims under 35 U.S.C. 102(b) by Nadeau-Dostie et al. (US Patent No. 6,510,534) has been withdrawn on the grounds that the Nadeau-Dostie applied reference (issued, January 21, 2003) was not patented more than one year prior to the filing date (filed, December 27, 2003) of the instant application.

Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior arts of record taken alone or in combination fail to teach, anticipate, suggest or render obvious a delay fault test circuitry and method for producing a train of two clock pulse, including among other limitations, "means for ending the second of the two clock pulses when the count value reaches a fourth threshold value, wherein the third threshold value is common for both clock signals and the first, second and fourth threshold values are based on the, respective frequencies of the clock signals", as currently recited in the independent Claims 1, 14, 16.

Similarly, independent Claim 15, as currently amended, recites a method including among other limitations, "the third threshold value is common for both input clock signals and the first, second and fourth threshold values are based on the, respective frequencies of the clock signals, wherein the said first, second and fourth threshold values comprise functions of the ratio of the fastest clock frequency to the clock frequency associated with the logic circuitry under test".

Consequently, Claims 1-16 are allowed over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
